Terrell County Schools Vision Statement

The Terrell County School District will ensure that all students learn to their fullest potential by becoming life, career and college ready through quality educational opportunities with collaborative efforts from students, parents, teachers, administrators and the community.

Terrell County Schools Mission Statement

The mission of Terrell County Schools is to provide quality educational opportunities through collaborative efforts of students, parents, administrators, and community. To accomplish this mission we believe that...

- All children can learn and become successful contributing members of society
- Successful programs are flexible and continuously improved
- High expectations produce high achievement because excellence cannot be compromised
- School improvement requires parental involvement and community
- High quality teachers promote student success through academic excellence and positive reinforcement.
- Opportunities for achieving technological literacy will support student achievement.
- All community resources must be focused to consistently and continuously raise the level of education and to promote literacy and lifelong learning in Terrell County.
- Integrated services from a variety of agencies (health, mental health, school and community) must be focused to strengthen families in their support and nurturing of children.

School Mission Statements

Lillie Cooper Primary School

We believe that every child is an unique and special individual who can learn. We believe that it is our responsibility to serve as facilitators for the nurturing and developing of every child's potential: academically, physically, socially, and emotionally. We are committed to providing opportunities which will assist the students in making self-directed, realistic decisions when solving problems that may confront them in our multi-cultural, ever-changing world.

Carver Elementary

We believe that education should be the instrument by which a child is oriented to the past, the present and the future and an important means by which a child is prepared socially, physically, morally, emotionally and academically to cope in a changing society. We believe that third, fourth, and fifth grade students should be prepared academically in the basic

disciplines in order to equip the child to survive and compete as an adolescent student in the higher grades, and eventually as an adult citizen, equipped to make a contribution to mankind.

Terrell Middle School and Terrell High School

Terrell Middle and High Schools are committed to inspiring all students to strive for academic excellence in a technologically informed age in order to achieve ultimately their potential roles as responsible citizens.
